

Leo Giesen

I am fascinated by information technologies, especially Machine Learning. This passion drives me to study Information Systems at the University of Münster with a focus on Business Intelligence. Through internships and part-time work, I have applied my theoretical knowledge in practice. In personal leisure projects and practical projects at the student consultancy move, I continuously enhance my analytical and conceptual skills. Currently, I aim to further develop my leadership qualities as Chairman of the Board and project manager at move.
